Avinor AS

Update following rating affirmation and outlook change to stable

Summary

[Avinor AS](#) (Avinor)'s credit quality takes account of (1) the company's near-monopoly position and modest transmodal competition for medium-long distance travel within Norway; (2) a supportive strategic framework established by the State, highlighting the importance of Avinor's operations to achieve societal objectives; (3) a high share of origin and destination traffic with a material share of domestic traffic; (4) the company's exposure to a weak carrier base; and (5) high financial leverage. Avinor's credit quality further benefits from support from the [Government of Norway](#) (Aaa, stable), which is the company's 100% shareholder.

Following the severe reduction in passenger volumes during 2020-21, Avinor's traffic picked up this year, reaching 89% of pre-pandemic levels in November. While recent trends have been overall positive, reflecting strong demand for travel, there is uncertainty around the medium-term traffic recovery in the context of the cost of living pressures, the current geopolitical environment and knock-on effects on the European economy, and the weak profile of Avinor's carriers. Against this backdrop, Avinor will increase investments and its operating costs will rise, which will limit the company's deleveraging prospects.

Exhibit 1

We expect Avinor's metrics to improve only gradually
Funds from operations (FFO) in NOK billion, and FFO/debt

The estimates represent Moody's forward view; not the view of the issuer.
Source: Avinor's reports, Moody's Investors Service

Credit strengths

- » Monopolistic position and modest transmodal competition
- » High share of domestic traffic, which has been more resilient than international traffic
- » Supportive strategic framework underpinned by government policy
- » 100% ownership by the Government of Norway and track record of state support

Credit challenges

- » Uncertain pace of the post-pandemic traffic recovery, given weakening macroeconomic conditions
- » Exposure to a weak and highly concentrated carrier base
- » High financial leverage

Rating outlook

The stable outlook reflects our expectation that Avinor's financial profile will be consistent with the current ratings, while the government support will remain high.

Factors that could lead to an upgrade

An upgrade of Avinor's ratings is unlikely in the near term and would require an upgrade of the company's BCA as well as an enhanced view of the level of government support. Avinor's BCA could be upgraded if the company were able to improve its operational and financial performance such that its FFO/debt ratio were comfortably in the low double digits in percentage terms on a sustainable basis.

Factors that could lead to a downgrade

Avinor's ratings could be downgraded if the company's FFO/debt ratio were below 8% on a sustained basis or if our assessment of high support for the company was to be revised downward.

Profile

Avinor AS owns and operates 43 airports in Norway and is the sole provider of air navigation services to both civilian and military flights within Norwegian airspace. Before the pandemic, the company's airports handled some 96% of Norwegian passenger traffic. Oslo Airport is by far the largest and accounts for around half of total traffic and almost 74% of international traffic. Other large airports with sizeable share of international traffic are Bergen, Stavanger and Trondheim.

Exhibit 4

Traffic breakdown by airport Data for January-November 2022

Total passenger traffic of 42 million.
Source: Company's reports, Moody's Investors Service

Avinor is 100% owned by the [Government of Norway](#) (Aaa, stable), but is incorporated as a limited liability company subject to normal laws. It is viewed as an important entity by the state on the basis that it fulfills "national sectoral political" objectives.

Detailed credit considerations

Key infrastructure provider subject to limited competition

Avinor owns and operates 43 airports and controls all key aviation infrastructure in Norway. Before the pandemic, the company handled around 99% of domestic air traffic and some 93% of international scheduled flights. In 2019, Avinor's airports handled around 55 million passengers (PAX).

Avinor's airports face limited competition from rail and road. Although the main population centres are linked by road and rail services, the topography of the country and large distances mean that air travel is the most efficient mode of travel. Fast rail connections are limited to the Oslo region and cover relatively short distances. Also, the location of Norway on the periphery of Europe means that air travel is largely required when traveling internationally.

Traffic has picked up this year but uncertainty remains around the pace of recovery over the medium term

Similarly to other European airports, Avinor has been severely impacted by the COVID-19 pandemic and the associated travel restrictions. Passenger volumes reached 20.8 million in 2020 (62% below 2019 level) and 23.1 million in 2021 (58% below 2019 level).

Avinor's performance was stronger than that of many European airports. This reflects its fairly high share of domestic traffic, which has been more resilient and restarted more quickly.

Traffic started to pick up more strongly this year as travel restrictions eased. Passenger volumes were some 9% below the pre-pandemic levels in the August-October period. The recovery rate was slightly lower in November, when traffic amounted to 3.7 million passengers, which is 11% below the pre-pandemic levels. The increase in traffic has been driven primarily by strong leisure demand – both domestic and international. Business travel is still below the pre-pandemic levels.

Exhibit 5

Avinor's traffic recovery has accelerated in 2022, given strong pent-up demand

Monthly traffic, in million PAX

Data available to October 2022.

Source: Company's website, Moody's Investors Service

Traffic recovery has not been uniform across the domestic and international segments. Over the May-October period, Avinor's domestic passenger volumes were some 6% below the 2019 level. In comparison, international travel was 18% lower in the same period.

Exhibit 6

Domestic traffic has been close to pre-pandemic levels

Passenger volumes, in million PAX

Source: Company's website, Moody's Investors Service

Exhibit 7

International traffic rebounded more strongly this year

Passenger volumes, in million PAX

Source: Company's website, Moody's Investors Service

Our current scenario assumes that traffic at European airports will remain below the pre-pandemic levels until at least 2025. (See [Airports — Europe: 2023 Outlook — Stable as economic headwinds hinder post-pandemic recovery](#), November 2022). For Avinor specifically, we expect traffic recovery to be influenced by its traffic mix and carrier base.

We currently assume that Avinor's traffic will reach around 83% of pre-pandemic levels this year and will continue recovery thereafter to around 90-95% in 2023 and 2024, but with a potential for a greater deviation around those average levels.

Overall, there is an uncertainty around Avinor's traffic recovery path in the context of weakening macroeconomic environment, cost of living pressures and continued uncertainty around the geopolitical situation in Europe. Recognising those risks, in our analysis, we have also considered a slower pick up in traffic over the medium term, with volumes remaining below the pre-pandemic levels beyond 2025. While lower passenger volumes for longer would have an impact on the company's earnings and cash flows, those assumptions need to be considered in the context of the group's ability to pace investments or take other actions to reduce expenditure.

Business travel strongly linked to the performance of the oil and gas sector

Avinor has a relatively high exposure to business travel, which accounted for around 34% of total traffic in 2019, compared with 24% for our rated European airports.

We expect business travel to be held back by changes in working patterns, use of technology and companies' focus on reducing costs and carbon footprint (see [Airlines – Global: Business travel faces higher substitution risk post-COVID, but airlines will adapt](#), March 2021). However, Avinor's business travel segment should be more resilient to these trends, given its strong linkage to the oil and gas sector. Still, the number of trips to and from oil and gas offshore platforms will be driven by the performance of the oil and gas industry, which can be volatile as seen in the past.

Exposure to a very weak carrier base makes traffic recovery prospects more uncertain

Avinor's carrier base is highly concentrated with fairly weak carriers. SAS AB, which initiated a voluntary Chapter 11 filing in July 2022, accounted for 38% of total traffic before the pandemic. Norwegian Air Shuttle, which has now restructured its operations, is the second largest airline. While there have been new entrants, such as Flyr, a new low cost carrier, and Norse, a long-haul low cost start up carrier, exposure to weak airlines is a risk and makes recovery in traffic more uncertain.

Exhibit 8

Avinor's carrier base is highly concentrated Total traffic breakdown, in 2019

Source: Avinor, Moody's Investors Service

Limited changes in airport charges deliver on the broader government policies

Norway is not a member of the EU, although the government has transposed the EU's Airport Charges Directive into Norwegian law. The directive sets out minimum requirements in terms of transparency, consultation with airlines and nondiscrimination of charges, and mandates the setting up of an independent supervisory authority.

At present, the state has effectively a direct role in setting aeronautical charges, with the regulatory oversight exercised by the Ministry of Transport and Communications (MoTC), which owns 100% of the share capital of Avinor. In practice, charges are set after consultation with airlines, given the company's and the Ministry's objective to encourage airlines to develop their route strategies in Norway rather than in nearby countries, such as Denmark and Sweden.

As a general principle, Avinor's tariffs are determined through the use of a price cap formula based on a fair return on a regulated asset base (RAB). Charges are determined to include allowances for operating costs, depreciation, return on the RAB and taxation. From this revenue requirement the non-aeronautical revenue is subtracted to determine the aeronautical revenue requirement (i.e., a "single till" approach), which is divided by anticipated volumes to determine the level of the anticipated unit price. In periods of high investments, not all the commercial profit may be used to subsidise airports charges.

Notwithstanding the above principles, Avinor's charges have not increased as provided under the revenue requirement. Following the start of the pandemic, the company did not collect aviation charges for around three months until June 2020 and kept commercial aviation tariffs flat in nominal terms in 2021. Airport tariffs were increased by 2% this year. For 2023, Avinor plans an adjustment to

tariffs of 3.5%, which means that the level of charges will continue to remain below the revenue requirement under the company's price cap model and there is uncertainty around the evolution of tariffs over the medium term. Next year, Avinor's tariffs will also include an increase of NOK3/PAX related to the police's cost because of new regulation for "entry/exit".

More generally, as the state requires Avinor to establish a uniform set of aviation charges across its network, this effectively leads to cross-subsidisation of the marginal rural airports by larger airports such as Oslo, Bergen, Stavanger and Trondheim.

Exhibit 9

Larger airports support loss-making regional airports

Reported EBITDA in 9M 2022, in NOK million

Source: Avinor's reports, Moody's Investors Service

Traffic is a key driver of aeronautical and commercial revenue

Avinor's revenue has been severely hit by lower traffic volumes. Aeronautical revenue dropped 63% and commercial revenue was down 64% in 2020. Stronger passenger volumes drove an improvement in income in the following year, but aeronautical revenue remained 51% below the pre-pandemic levels. Commercial revenue has been also hit by lower traffic, although the impact was not uniform across different segments. The duty free segment reported the biggest decline in revenue, given weaker international traffic and temporary closure of some of the stores. Overall, a decline in Avinor's total revenue was, however, smaller than for other European airports, given the receipt of government grants that amounted to NOK3.6 billion in 2020 and NOK3.8 billion in 2021.

As traffic picked up this year, all revenue streams were up in the nine months to September 2022.

Exhibit 10

Government grants supported revenue during the pandemic

Revenue breakdown, in NOK billion

Exhibit 11

Yield performance impacted by traffic levels and mix

Evolution of revenue and yields

Aeronautical revenue does not include air traffic services.

Source: Avinor's reports, Moody's Investors Service

Evolution of aeronautical and commercial yields has varied given different sensitivity to passenger volumes. Commercial yields decreased as domestic traffic accounted for the bulk of total, which impacted, *inter alia*, revenue from duty free. Aeronautical yields have been up since the start of the pandemic, which reflects a different traffic profile and load factors in the context of the airline capacity.

We expect commercial yields to be under pressure over the medium term. The duty free contract covering main airports will start from next year but revenue will be negatively impacted by the government proposal to reduce by 50% the quota on imported tobacco products, which are an important duty free offering. Management estimates that the annual loss of income for Avinor will be around NOK270 million. A number of other contracts across retail and car parks has been also re-tendered, but with a broadly neutral impact on expected yields.

Rising operating costs will hinder growth in EBITDA

Lower passenger volumes have resulted in some immediate volume-dependent savings for Avinor since the start of the pandemic. Still, the company sought to cut costs through the use of new technology, innovation and employee layoffs, given a largely fixed-cost base. The cost-cutting programme assumed a reduction in operating costs of NOK1 billion by end of this year.

Costs will increase as passenger volumes rise. Furthermore, Avinor will face pressure from higher inflation, wages and energy costs. Growth in operating costs will hinder the pace of improvement in the company's EBITDA, which will be also impacted by limited increases in charges and pressures on commercial income.

Exhibit 12

We expect Avinor's EBITDA to be under pressure from rising operating costs

EBITDA in NOK billion and EBITDA margin (%)

Source: Company's reports, Moody's Investors Service

Shareholder support has limited increase in net debt burden; higher investments will slow down deleveraging

Avinor's adjusted net debt has increased since the start of the pandemic despite a cut in investment plans and the receipt of equity injections from the government. Some of the increase in the adjusted net debt was, however, due to the rise in pension liabilities.

The company's capital expenditure amounted to around NOK4.9 billion in 2020-21. The actual spend was some NOK3.6 billion lower than planned before the pandemic as some of the projects were deferred. Investments were, however, still significantly higher than cash flow from operations. In this regard, the equity injections from the government, which totalled NOK7.4 billion, have been a key factor in limiting the increase in Avinor's net debt.

Exhibit 13

Avinor's net debt has risen despite government grants

Evolution of Moody's adjusted net debt, in NOK billion

Source: Company's reports, Moody's Investors Service

Avinor plans an increase in investments over the medium term to around NOK3.5 billion a year, on average. Around two-thirds of capital expenditure will be focused on maintenance and government-required projects. These include the construction of new airports in Bodø and Mo i Rana. Around NOK1.7 billion of the cost will be funded by the state grants, with the potential for additional funding to be agreed at a later stage. According to the latest announcement, the cost of construction of a new Bodø airport is estimated at NOK7.2 billion (2022 prices), not including the purchase of land. Only some of the cost will be incurred by Avinor.

Higher capex will slow down the pace of Avinor's deleveraging, which has been reflected in the downgrade of the company's baseline credit assessment (BCA) to baa2 from baa1 in November 2022. (See [Moody's affirms Avinor's A1 ratings, changes outlook to stable from negative](#), November 2022).

Track record of support from the Government of Norway

Avinor's credit quality takes account of the company's central role in the provision of air travel in Norway. Given the patterns of population distribution in Norway and certain geographical features, air travel is an essential facilitator of domestic mobility, and the government therefore sees Avinor as strategically important to meet some of its key economic, social and political objectives. While the state aims to ensure the state-owned entities make a fair return on capital employed, this is not the primary objective of Avinor.

The company has benefited from government support since the start of the pandemic. Avinor received a total of NOK7.4 billion in operating subsidies in 2020-21. The level of support was high in absolute and relative terms, and was tailored to allow Avinor to comfortably meet its minimum equity ratio requirement of 40% included in the company's bylaws.

Exhibit 14

Avinor has received material government subsidies since the start of the pandemic

in NOK million

	2017	2018	2019	2020	2021	9M 2022
Operating revenue	11,526	11,724	11,785	4,583	5,514	7,564
Government grants	-	-	-	3,600	3,800	0
Total income	11,526	11,724	11,785	8,183	9,314	7,564

Source: Avinor's reports, Moody's Investors Service

The government has not budgeted for any further support to Avinor.

Against this backdrop, the Ministry of Transport, as the owner, granted Avinor a temporary permission to deviate from the minimum equity ratio requirement of 40%. Such permission was recently extended until 31 December 2023, given uncertainty around the evolution of this ratio in the current market environment.

Exhibit 15

Avinor has been permitted by its owner to deviate from the minimum 40% equity ratio requirement
Equity ratio as defined in the Articles of Association

Source: Avinor's reports, Moody's Investors Service

Liquidity

As of end-September 2022, Avinor had cash on balance sheet of around NOK1.7 billion, NOK300 million of available overdraft facility and NOK4 billion availability under credit facilities due in June 2026. The company has fairly modest debt maturities in the near term related to amortisation of loans of around NOK0.9 billion in each of 2023 and 2024.

Exhibit 16

Avinor has fairly modest debt maturities until 2024
As of end-September 2022, in NOK billion

Source: Company; Moody's Investors Service

Avinor's borrowings from European Investment Bank, Nordic Investment Bank and the commercial banks, are subject to a financial covenant defined as an equity ratio of at least 30%. We expect the company to remain compliant with this ratio.

ESG considerations

Avinor AS' ESG Credit Impact Score is Moderately Negative CIS-3

Exhibit 17

ESG Credit Impact Score

CIS-3

Moderately Negative

For an issuer scored CIS-3 (Moderately Negative), its ESG attributes are overall considered as having a limited impact on the current rating, with greater potential for future negative impact over time. The negative influence of the overall ESG attributes on the rating is more pronounced compared to an issuer scored CIS-2.

Source: Moody's Investors Service

Avinor's ESG Credit Impact Score is moderately negative (**CIS-3**). This reflects limited credit impact to date, but the potential for carbon transition and related social risk factors to pressure the rating over time. The credit risks are longer term in nature, although policy responses may gradually impact the company. Its score reflects moderately negative environmental, social and governance risk.

Exhibit 18

ESG Issuer Profile Scores

ENVIRONMENTAL

E-3

Moderately Negative

SOCIAL

S-3

Moderately Negative

GOVERNANCE

G-3

Moderately Negative

Source: Moody's Investors Service

Environmental

Avinor's credit exposure to environmental considerations is moderately negative (**E-3**) because of carbon transition. Evolving decarbonisation policies around the globe and regulations may increase operating costs for airlines and result in higher airfares that reduce the demand for air travel. Further, the desire by some to reduce carbon emissions may lead to reduced travel, in particular corporations seeking to reduce their carbon footprints. At the company level, Avinor is committed to fossil-free operations by 2030. The company has a moderately negative exposure to waste pollution, including noise pollution, while risks associated with water management and natural capital are neutral-to-low.

Social

Avinor has moderately negative (**S-3**) exposure to social risks related to demographic and societal policies moving to reduce carbon emissions. There is a risk that such policies and/or trend may lead to lower travel volumes or higher costs. While the lack of viable alternatives is a mitigating factor, Avinor is exposed to global trends that may affect international traffic. These risks are balanced by neutral to low risks to customer relations, human capital, health and safety and responsible production.

Governance

Avinor's governance risks are moderately negative (**G-3**). This assessment takes into account neutral to low scores on financial strategy and risk management, management credibility and track record, organizational structure and company's compliance and reporting. These considerations are somewhat counterbalanced by the moderate risk associated with board structure, resulting from having the Government of Norway as the sole owner of the company and the tariff evolution that considers broader policy objectives.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Rating methodology and scorecard factors

Avinor is rated in accordance with the rating methodology for [Privately Managed Airports and Related Issuers](#), published in September 2017. Given the 100% ownership by the Government of Norway, Avinor is considered a Government-Related Issuer (GRI) under Moody's methodology for [Government-Related Issuers](#), published in February 2020. The high support assumption takes into account Avinor's role as key infrastructure provider in Norway and its role in delivering the government's policy objectives.

Exhibit 19

CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
